ABOUT PHOTOSENSITIVE SEIZURES

A very small percentage of people may experience a seizure when exposed to certain visual images, including flashing lights or patterns that may appear in video games. Even people who have no history of seizures or epilepsy may have an undiagnosed condition that can cause these "photosensitive epileptic seizures" while watching video games.

These seizures may have a variety of symptoms including: lightheadedness, altered vision, eye or face twitching, jerking or shaking of arms or legs, disorientation, confusion, or momentary loss of awareness. Seizures may also cause loss of consciousness or convulsions that can lead to injury from falling down or striking nearby objects.

Immediately stop playing and consult a doctor if you experience any of these symptoms. Parents should watch for or ask their children about the above symptoms—children and teenagers are more likely than adults to experience these seizures.

The risk of photosensitive epileptic seizures may be reduced by sitting further from the television screen, using a smaller television screen, playing in a well-lit room, and not playing when you are drowsy or fatigued.

If you or any of your relatives have a history of seizures or epilepsy, consult a doctor before playing.

OTHER IMPORTANT HEALTH AND SAFETY INFORMATION

The Xbox video game system documentation contains important safety and health information that you should read and understand before using this software.

AVOID DAMAGE TO YOUR TELEVISION

Do not use with certain televisions. Some televisions, especially front- or rear-projection types, can be damaged if any video games, including Xbox games, are played on them. Static images presented during the normal course of game play may "burn in" to the screen, causing a permanent shadow of the static image to appear at all times, even when video games are not being played. Similar damage may occur from static images created when placing a video game on hold or pause. Consult your television owner's manual to determine if video games can be safely played on your set. If you are unable to find this information in the owner's manual, contact your television dealer or the manufacturer to determine if video games can be played on your set.

Unauthorized copying, reverse engineering, transmission, public performance, rental, pay for play, or circumvention of copy protection is strictly prohibited.

SHREDDING THE SLOPES

Get familiar with riding on this mountain or you might end up as a tree ornament.

GAME SCREEN

Most events begin with your rider at the starting gate at the top of the mountain. Once the gate opens, your rider automatically starts down the hill. Take control and get some speed right out of the gate by moving the **L** ↑.

SCORING

Hammer out some cool tricks and watch your score rise. The bigger the trick, the bigger the reward.

- Always use a variety of tricks. If you keep trying the same trick, the points for that trick decrease.
- A combination of solid tricks pulled off with good style is the best way to rack up the points and adrenaline.

ADRENALINE METER

Fill your Adrenaline Meter by pulling off tricks, then use your adrenaline when you need some extra speed or **ÜBER** tricks. To use your adrenaline boost, press **X** while on the ground.

- The boost you get from using your adrenaline depends on the level of the Adrenaline Meter. When the Adrenaline Meter is filled to the red level, you get a bigger boost than if it's in the orange, which in turn gives a bigger boost than the yellow level.
- Adrenaline decreases over time and when you fall. The longer you ride without performing tricks, the more your Adrenaline Meter decreases.
- Riding to the start of events gives you the chance to increase your adrenaline by doing tricks, allowing you to begin an event with adrenaline.

TRICKS

Strap a board to your feet and display your innate ability to twist and contort your body while airborne.

GRABBED AIR TRICKS

Grab your board in funky ways while flying high.

TO PERFORM A GRABBED AIR:

1. Press and hold **A** to crouch as you approach a jump. Just before the end of the jump, release **A** to take off.
 2. While in the air, press and hold **X**, **Y**, **B**, or pull and hold **R** to perform a grabbed air trick.
- ➔ Show off wilder grabs by pressing two or more of the above buttons at the same time.
 - ➔ To tweak a grab, pull and hold **L** while holding the grab. You will get an extra twist as you perform the trick, increasing the difficulty and risk. When the Adrenaline Meter is full, tweaking allows you to perform ÜBER tricks (> ÜBERs and Super ÜBERs on p. 12).
 - ➔ As your body falls closer to the snow pack, release all buttons and level out the board for a smooth landing.

ROTATION TRICKS

Ever wonder what the mountain looks like from the air, upside down, and at a 45-degree angle?

- ➔ Press **⬆** to spin and flip. Pre-wind by pressing **⬆** while you are crouching to spin and flip faster.

TO PRE-WIND A SPIN OR FLIP:

1. Press and hold **A** to crouch as you approach a jump.
 2. Press and hold **⬆** in the direction you want to spin or flip.
 3. Release **A** to jump while holding down **⬆**.
 4. When you get close to the ground, release all buttons to prepare for landing.
- ➔ If you press and hold **⬆** **↖** / **↗** / **↘** / **↙**, you flip diagonally, which is a tougher trick to land.

BOARD PRESSES

Throw down some fancy footwork and test your balance skills between air and rail tricks with nose and tail presses.

- ➔ Move **R** **↑** to perform a nose or tail press. Hold it as long as you can to maximize points, but be sure to ease up before your rider loses balance.
- ➔ Move **R** **↔** around to spin your press and hang it out to the side. This helps you regain balance and maintain those presses.

RAIL SLIDING

Grab even more points by pulling off stunts on fallen trees, rails, and other rail slide opportunities.

TO RAIL SLIDE:

- ➔ Just ride onto a rail or press **A** to jump onto higher rails.
- ➔ Press **⬆** **↔** to spin on the rail.
- ➔ Press **L** **↔** to adjust your balance on the rail.
- ➔ Try out your board presses on rails.

COMBOS

String tricks and presses back to back to create a combo line. Every trick you do in a successful combo line is worth a bonus for each trick. The later in a combo you perform a trick, the higher the bonus.

- ➔ Remember, if you fall during a combo line you lose all the accumulated combo points.

HANDPLANTS

Handplants can be used to access shortcuts, upper or side pipes, and even transition lines.

- ➔ Press **L** **↔** to adjust your balance in a handplant.
- ➔ Release the handplant when you are balanced straight up to exit your handplant onto the rail.
- ➔ Release the handplant when you are leaning to one side to exit your handplant on that side of the rail.

ÜBERS AND SUPER ÜBERS

When the Adrenaline Meter is full, it glows and it's time to execute your sweetest moves. Make sure you have enough air or a long rail—these tricks take extra time to pull off!

TO BUST OUT WITH AN ÜBER OR SUPER ÜBER TRICK:

1. When the Adrenaline Meter is full, get some serious air and tweak any of your four basic grabs or the nose and tail grabs to start the ÜBER trick.
 2. Perform four ÜBER tricks to spell ÜBER and open the door to even more insanity with Super ÜBER tricks. Use the same button combinations as ÜBER tricks to unleash Super ÜBER tricks.
 3. If you manage to spell out SUPER ÜBER, your Adrenaline Meter stays full for a short period of time. Use this time to stay boosted and gain a massive speed advantage.
- ➔ All ÜBER tricks can be held to max out points gained—just hold down the grab and tweak buttons and watch your points rack up.

ÜBER TRICK CONFIGURATION

Select Rider Details to enter ÜBER trick configuration where you can preview, purchase, and activate new ÜBER and Super ÜBER tricks.

Rider Details can be found in any lodge during Conquer the Mountain mode, or in the Setup Character screen for Single Event and Multi Play.

EVENT TYPES

Race Events have a Qualifying Round, Semi Final, Round, and a Final Round. Slopestyle, Super Pipe, and Big Air events have one Qualifying Round and a Final Round.

FREERIDE

Enter an event on a track and then bypass the start gate to freeride and look for BIG Challenges.

RACE

It's all about finding the fastest line down the course. Pull off tricks while you race, and you can take advantage of increased adrenaline for a speed boost. Watch out for other riders—they can get physical to create their own advantage.

SLOPESTYLE

Slopestyle is a freestyle event in which you try to find the best line given your skills and style of riding. You are then judged on the tricks and maneuvers you pull off during the run. Slopestyle courses are about finding your own line and rhythm. There is no one proper line down a Slopestyle course, just the line you like best. Players compete for first place by accumulating the most points during a run.

SUPER PIPE

The Super Pipe event is the ultimate combination of tricks and huge air. Show that you have the skills to link tricks together on the ground and in the air. Pull them off and dominate this event.

BIG AIR

Rack up frequent flyer miles, and throw tons of tricks in Big Air events. It's all about catching air and pumping up your score with combo strings and as many ÜBER tricks as you can muster.

RIVAL CHALLENGES

It's not just about winning the events on the mountain. You must prove yourself in one-on-one duels with rival competitors in the backcountry and in the ultimate challenge, the Peak Events.

BACKCOUNTRY RACE AND JAM

When you win medals in each of the events in Race or Freestyle, a rival shows up to challenge you to a one-on-one showdown in the backcountry. The type of challenge you get is based on the events you have won medals in—a Race for race events, and a Jam for freestyle events. You have to beat the rival to earn your chance at the next step: the Peak Events.

PEAK EVENT

Winning the Backcountry event opens your chance to test yourself against your rival's best performance.

- ❖ Racers start at the top of the Peak and race down to the city. Sounds easy enough, but times range from 12 minutes to half an hour.
- ❖ For freestyle specialists, the Peak Jam includes both the Backcountry and the Slopestyle tracks. The Peak 3 Jam runs through all the race tracks, this time for points.
- ❖ All you have to do for the Peak events is beat your rival's best score or time to win the trophy. Once you are on top, watch out for challengers looking to take you down.
